

The Process Plugins™ Air Cooled Condenser Fan Advisor provides real-time optimal ACC Fan configuration in order to minimize the unit's (or entire plant's) net heat rate. The ACC Fan power consumption is considered in determining the optimal ACC Fan configuration for the real-time given conditions.

The complete documentation of the Process Plugins™ Air Cooled Condenser Fan Advisor is currently under development and will be completed in the near future. If you have an immediate need for a detailed description or need to know the status of testing and availability of any of the Process Plugins™ Solutions, please contact us by one of the methods below. Thank you for your interest in the Process Plugins™ Solutions.
