

With the Process Plugins™ Boiler & Air Heater Condition Monitor, boiler losses and are calculated real-time and compared to expected losses and overall boiler efficiency. Air heater exit gas temperature (corrected to zero leakage), gas side efficiency, and x-ratio are calculated and compared to expected real-time values.

The complete documentation of the Process Plugins™ Boiler & Air Heater Condition Monitor is currently under development and will be completed in the near future. If you have an immediate need for a detailed description or need to know the status of testing and availability of any of the Process Plugins™ Solutions, please contact us by one of the methods below. Thank you for your interest in the Process Plugins™ Solutions.
