

With the Process Plugins™ Solar Array Condition and Assets Monitor, solar array parameters are organized by Region, Site, and Components within PI-AF. A master display is provided with drill-down capabilities to support multiple levels of hierarchy. Calculations include Availability, Capacity Factors, and totalizing functions.

The complete documentation of the Process Plugins™ Solar Array Condition and Assets Monitor is currently under development and will be completed in the near future. If you have an immediate need for a detailed description or need to know the status of testing and availability of any of the Process Plugins™ Solutions, please contact us by one of the methods below. Thank you for your interest in the Process Plugins™ Solutions.
